

Undergraduate Scholarship Program

The Undergraduate Scholarship Program will provide financial assistance to undergraduate students majoring in nuclear engineering and radiological health engineering at Texas A&M University. With 236 undergraduate students, a diverse and quality student pool is available to select recipients from. The major impact of this program will be an increased and well-prepared engineering workforce for the nuclear sector.

Institutional support enables a comprehensive structure for the Undergraduate Scholarship Program from the recruiting stage through the internal competition process and retention programs to the employment stage. The Undergraduate Scholarship Program will be implemented as an integrated element of a state plan to develop a larger nuclear workforce through the Nuclear Power Institute (NPI). Throughout the program, scholarship recipients will be mentored by faculty and receive academic and employment advising.
